
Phase 7:Project Documentation

SmartLenderAI-Powered Credit Card Approval System

Repository Structure

- Dataset/ - raw applicant data
- Flask/ - web application and trained model artifacts
- Project Documentation/ - phase-wise project reports
- Training/ - model training notebook

How to Run Locally

1. Install dependencies with `pip install -r requirements.txt`
2. Place the dataset CSV in the Dataset/ folder
3. Run all cells in the training notebook to generate the model files
4. From the Flask/ folder, run `python app.py`
5. Open the local address shown in the terminal to use the form
